DDI User Group Denmark

Mogens Grosen   **Statistics Denmark**
Jannik Jensen   **National Danish Archives**

Agenda

1. Background
2. Vision statement
3. Missions
4. Roadmap objectives

Background - challenges

Tradition
- Use standards for building cost-effective systems
- Use metadata to document existing information
- Lacking international focus /model (GSBPM, GSIM etc)

Today:
- How to build legitimate democratic information societies in a globalized world?
- Information should be used as a common democratic, knowledge and political ressource
- How to avoid medieval kingdoms each figthing to protect their own data and metadata?

Background

Initiatives

- DDA is migrating their collection -changed curation workflow and opening their dissemination systems of reuse to target DDI-L

- DST is restructuring their production and dissemination systems to target GSBPM, GSIM and DDI-L

- A Danish dialog of metadata exchange has been formed and is continuing

Dialog of danish metadata:
DDI user group Denmark

Vision statement

Our vision is to encourage, facilitate and accommodate the use of DDI in danish infrastructure
